SPIROLL BED CLEANER

The Bed Cleaner is a multi-purpose machine that speeds up the labour-intensive jobs in the preparation of hollowcore casting beds. It can be powered via a low-emission diesel engine, battery or electrically.

The cleaner sprays mould oil/release agent while three rotating brushes clean both the bed pallet and chamfer rails. Capable of pulling up to 10 x 12.5 mm prestressing strands, it incorporates an interchangeable cover roller, which lays and uplifts the insulation covers used to accelerate the curing time of slabs.

From the safety of the protective cabin, the operator controls the unit hydraulically at speeds ranging from 25 to 40 metres per minute.

SPECIFICATIONS

Length	4.90 m
Width	2.14 m
Height	2.40 m
Weight	2,800 kg
Engine	4-cylinder diesel
Motors	31.5 kW @ 2500 rpm
Drive	2 travel speeds 4WD
Travel Speed	40 m/min
Sprayer Tank	45 Litres
Strand Puller	10 x 12.5 mm strands

FEATURES

- Rotating main bed brush
- Two additional chamfer rail brushes
- Six mould oil spray nozzles
- Pulls up to 10 x 12.5 mm strands
- Slab insulation cover roller
- Low-emission, 4-cylinder diesel engine
- Optional battery/electrically-powered version
